📍 Ho Chi Minh City

📅 DOB 02 / 01 / 2001

SUMMARY

Software Engineer with 3+ years building cross-platform mobile, web, and desktop apps in Flutter. Strong in Bloc / Provider state management, Clean Architecture, CI/CD, and real-time systems (MQTT, WebSocket); also experienced in Android Native (Kotlin / Java) and ReactJS. Delivered production apps end-to-end — from architecture to App Store, Google Play, and Microsoft Store releases — and integrate AI tools daily to accelerate delivery and code quality.

WORK EXPERIENCE

Software Engineer

Apr 2026 – Present

Galaxy Technology Services

SkyJoy

4/2026 – Present · Team 30

A loyalty & banking app — SkyPoint accumulation, redemption across **250+ brands**, and an integrated wallet (SkyPay / Galaxy Pay). Partners: VPBank YOJO, HDBank, Vikki, HD Insurance, Furama Resort, bTaskee.

Tech: Flutter, Dart · Bloc, flutter_bloc, go_router · Clean Architecture · get_it, injectable · Adjust SDK, Firebase FCM & Analytics · Jenkins, Fastlane

- Built cross-platform loyalty & banking features (iOS & Android).
- Integrated multi-partner APIs for point conversion & tier management (Sky+, Gold Plus).
- Implemented Firebase FCM push and deep linking for personalized engagement.
- Owned CI/CD (Jenkins + Fastlane) for automated App Store & Google Play releases; contributed to the web portal.

Software Engineer

Oct 2024 – Apr 2026

Quoc Viet Trading and Engineering Co., Ltd.

Syrup Mixing System

5/2025 – 4/2026 · Team 10

Web & cross-platform system for Suntory PepsiCo factories that automates the syrup mixing process — accurate ingredient control, batch tracking, and efficient production operations.

Smart Form Interface

10/2024 – 4/2025 · Team 10

Multi-platform solution streamlining report generation through digitized forms, automated workflows, and operational data visualization.

Tech: Flutter, Dart · Bloc, go_router · Clean Architecture · get_it · dio, drift, REST · excel, pdf, printing, rxdart · Jenkins, Fastlane, MSIX

- **Release management:** owned merging, versioning & publishing to App Store, Google Play, Microsoft Store; mentored 1 developer.
- **CI/CD & DevOps:** built and maintained Jenkins / Fastlane / PowerShell pipelines for automated testing & deployment.
- **Quality & stakeholders:** wrote unit tests for stability; ran onsite user training and gathered requirements directly with clients.

EDUCATION

B.Sc. Information Technology

HCMC University of Foreign Languages – Information Technology
Sep 2019 – Jul 2023

CERTIFICATES

TOEIC Listening & Reading — 705
Sep 2022

HIGHLIGHTS

Shipped **6** cross-platform apps across enterprise & healthcare.

Released to **App Store, Google Play & Microsoft Store.**

Built end-to-end **CI/CD** with Jenkins & Fastlane.

Real-time IoT via **MQTT & WebSocket.**

Software Engineer

Jan 2023 – Oct 2024

Onsky Health International

Onsky SkyHealth1/2023 – 10/2024 · Team 9

Healthcare monitoring mobile app for remote patient & child observation, integrating IoT device management and live camera streaming.

Tech: Android Native (Java / Kotlin), Flutter (Add-to-App) · Retrofit, MQTT, REST · VStarCam camera SDK, Firebase, WebView

- **Native Android:** maintained & optimized the codebase, resolving complex issues for app stability.
- **Camera integration:** integrated specialized third-party SDKs (VStarCam) for robust live streaming & remote control.
- **Hybrid architecture:** embedded Flutter modules into the native Android app.

Onsky SkyCare1/2023 – 10/2024 · Team 9

Web & mobile apps integrated with IoT medical devices for healthcare monitoring and device management.

Tech: Flutter, Dart · Provider, go_router · HTTP, Chopper, MQTT, WebSocket, Firebase, Push · fl_chart · Fastlane, CI/CD

- **Feature development:** delivered mobile features in Flutter; authored unit tests and built CI/CD pipelines.
- **Release management:** managed end-to-end publishing to Google Play and the App Store.

AI-ASSISTED DEVELOPMENT

- **Architecture & logic:** use Claude to design system architecture, model complex business logic, and plan data flows before implementation.
- **Code generation:** scaffold Bloc events/states, API layers, and models, then refactor large Flutter codebases with Cursor for speed and consistency.
- **Quality & debugging:** generate and expand unit tests, and use ChatGPT to troubleshoot real-time (MQTT/WebSocket) and hybrid-architecture issues.

Impact: shorter delivery cycles, higher code quality and maintainability, and stronger test coverage across projects.
